EXPERIENCE

Technical Lead (Project: iQUA.ai)

Oct. 2022 – Present

iQuadra Information Services

- Led a team of 15+ developers, assigning tasks strategically following Agile and Scrum methodologies.
- Processed data from over 30,000 interviews to fine-tune Llama 3.1, Mistral, BERT, and T5 for various NLP tasks (e.g., asking follow-up questions, rephrasing, scoring answers, and providing feedback).
- Built APIs using FastAPI in Python to serve the data in a fast and secure manner to the frontend as well as integrated various 3rd party AI tools like OpenAI and DeepGram into the product.
- Deployed fine-tuned LLMs for inference using AWS SageMaker and GCP.
- Utilized multiple AWS services, including Lambda, Amplify, API Gateway, RDS, IAM, SES, EC2, S3, Secrets Manager, Step Functions, Sagemaker, and Event Bridge.
- Managed MySQL databases single-handedly and worked with vector databases like Weaviate.
- Oversaw cloud installations and maintained Dev/Prod AWS accounts.
- Actively participated in product design, feature meetings, and strategic decision-making.
- Managed company interns and led the development of an auxiliary AI-powered bug-tracking product, BugSprint, as the sole Designer, Product Owner, DB Admin, Technical Lead, and Scrum Master.
- Participated in hiring processes, interviewing over 300+ freshers across multiple Colleges like Aditya university, KLU, Veltech university etc.
- Represented iQUA.ai in marketing initiatives, attending an India-wide HR summit (March 2023, Delhi) and APTPO consortium (Feb 2024, Kurnool), as well as demoing the product in various colleges.
- Been an Integral part of two iQconnect events (A corporate X Institute technical event) been a lead speaker in the iQED talks at Nellore (12 Jul. 2024) and at Aditya university (14 Nov. 2024)
- Worked with the marketing team to educate them on Technicalities and AI, helping them optimize marketing strategies and also participated in

Software Developer (Project: iQuizUAnswer)

Jul. 2022 – Oct. 2022

iQuadra Information Services

- Developed multiple APIs using FastAPI in Python and handled the complete Database of the Product in MySQL
- Web-scraped over **200k** question answers from multiple websites for the model training
- Built and integrated multiple front end pages in ReactJS, Redux
- Built a Custom Answer evaluator with matching score using Semantic Textual Similarity
- Worked with AWS services like Lambda, API Gateway, Cloudfront, RDS, SES during the development of the APIs

Machine Learning Team Lead

Jul. 2021 – Jun. 2022

Indian Servers

- Instructed multiple teams on the concepts of Machine Learning and gave hands-on experience on Libraries like Pandas, Matplotlib, sci-kit learn etc
- Gave a 45 Minute presentation to 500+ faculty and HoDs of JNTU(H) university on Deep Learning with Live Demo
- Co-Authoured and made videos for the "Python for Beginners" course by Indian Servers on coursedunia.com

Game Developer Intern

May 2021 – Jul. 2021

Motion Dime

- Built 3 Projects i.e. high fidelity graphics Virtual Stalls single-handedly for our client Garware for showcasing their Paint Protection Films, Glass window films and other Mechanical parts showcasing in Virtual 3D worlds using Unity Engine and C-Sharp

Machine Learning Trainee

Apr. 2020 – July 2020

Indian Servers

- Explored machine learning methodologies for prediction, regression, data cleaning, and interpolation.
- Gained a statistical perspective on the impact of cost functions and accuracy in machine learning.

EDUCATION

Birla Institute of Technology and Science, Pilani

Master of Technology - Artificial Intelligence and Machine Learning

Oct. 2023 – Oct. 2025

Narayana Engineering College

Bachelor of Technology, Computer Science Engineering

June. 2018 – June 2022

TECHNICAL SKILLS

Gen AI: NLP, LLMs (Llama 3.1, 3.3, Mistral, Gemma, GPT, BERT, T5), fine-tuning models, Transformers, Unsloth, Retrieval Augmented Generation (RAG)
Deep Learning: PyTorch, TensorFlow, Hugging Face, PEFT (Parameter-Efficient Fine-Tuning)
Cloud & DevOps: AWS (S3, Lambda, EC2, SageMaker, API Gateway, Step Functions, Event Bridge, IAM, SES, RDS, Amplify, CLI), GCP, Git, Docker
Full-Stack Development: Python, FastAPI, ReactJS, Flask
Programming Languages: Python, C, JavaScript, C#
MLOps: Model deployment, monitoring, versioning, CI/CD for ML models, finops
Databases: MySQL, PostgreSQL, Neo4j, Weaviate, ChromaDB
Project Management: Agile, Scrum, JIRA
